City of Waleska Water Authority
Office of the Mayor
Water Agreement

Water bills are due on the fifteenth (15th) of each month, and a late fee of 10 percent (10%) of the unpaid amount will be assessed on bills on the sixteenth (16th), and water service will be disconnected ten (10) days after the due date, unless a written request for hearing in person by the City Clerk on behalf of the water system within ten (10) days after the bills are sent. Failure to appear at the scheduled hearing will result in service being immediately disconnect without further notices. Water service will not be restored until all water usage fees, late fees, penalties, and all other charges associated with the disconnect of water service have been paid in full, as governed by ordinance.

I furthermore understand that under no circumstances am I to allow anyone to tap into my water service. The meter assigned to me is to register the water usage for those living in my residence only. Should another dwelling or business be added to my water service, I fully understand this would be in violation of my agreement with the Waleska Water System and therefore, I shall be liable for any additional tap fees and legal expenses necessary to ascertain that there is one tap and meter per single family dwelling or business and/or tap and meter for each apartment in a multi-family dwelling, as well as any other charges and penalties, including disconnection of water service. I furthermore agree that the Waleska Water System, or their representative, shall have an easement to allow free access to any and all material belonging to them to and including the tap box and its contents. Any attempts to prevent their access may be viewed as an ordinance violation and may be cause for disconnection of water service.

I further understand that the Waleska Water System, in providing water service, is under an obligation to provide that service in accordance with State rules and regulations. By signing this agreement, I acknowledge that the Waleska Water System is not responsible for providing more than the State mandated amount of water pressure beyond the meter, although it may do so, and is further not responsible for ensuring that I have sufficient water pressure to meet the needs associated with my household and/or business or for losses which occur on my side of the meter.
